**Note:**

- GLAS LPIS parcel selection optimises financial drawdown under GLAS scheme.
- Newly digitised LPIS parcels 2 and 5 can be planted under Afforestation Scheme without impact on GLAS payments or eligibility under that scheme. Additional setback zones will be put in place in combination with establishment of a native species riparian woodland margin within parcel 5 upon afforestation to enhance the GLAS area along the stream protected from bovines.
- New LPIS parcels 2 and 5 can be planted post entry into GLAS provided planting does not overlap or impact on linear GLAS features such as hedgerows, riparian zones or point features such as bat boxes.
- Planting of GLAS LPIS parcels post entry into GLAS will involve repayment of monies received for GLAS actions carried out within afforested GLAS parcels.
